

## THE FIRST LANGUAGE (proto-plantlang)

### Things that should be incorporated into the language

- Plant sounds (rustling, etc.) ✓
- Plant behavior
- Magic and shadows
- Invasive species (racism?)

### 1 Premise

Plantlang is a fusional head-initial lanugage

#### 1.2 History of the language

4 phases :

1. regular tree
2. sentient tree (they know about life and death, day and night, basic language, fire and rain)
3. Dryads (they got legs now)
4. plant people (functional as a player character)

### 2 Phonology

We got: sounds sometimes, and then other times you dont make sounds

- [s] Sssss like wind
- S's's's like wind but stuttery
- [h] Hhhhhh like wind again

Features:

- Phonemic creaky voice ~
- Breathy voice ..
- ~~Tonal or pitch accent~~
- Whistling x<sup>w</sup>
- Aspiration
- No vowels

#### 2.1 Consonants

Consonants	Bilabial	Labio-dental	Dental	Alveolar	Post-alveolar	Velar	Glottal
Plosive	p p <sup>h</sup>	p̣ p̣ <sup>h</sup>	t̪ t̪ <sup>h</sup>	t t <sup>h</sup>		k k <sup>h</sup>	ʔ
Fricative	ɸ(:)	f(:)	θ(:)	s(:)	ʃ(:)	x(:)	h(:)
Affricate	pf(:)	pf(:)	tθ(:)	ts(:)	tʃ(:)	kx(:)	

## 2.2 Phonotactics

syllable structure: PF(P)

Where P is a plosive and F is a fricative

## 2.3 Stress

Stressed syllables have a whistled nucleus.

Nuclei	Bilabial	Labio-dental	Dental	Alveolar	Post-alveolar	Velar	Glottal
Unstressed	ϕ(:)	f(:)	θ(:)	s(:)	ʃ(:)	x(:)	h(:)
Stressed	ϕ	f	θ̥	s̥	ʃ	x <sup>w</sup>	h <sup>w</sup>

## 3 Word Order

- VSO (head-initial)
- head(verb) → torso(subject) → 4 limbs(object)
- How does changing word order change meaning? Can you change only the word order or do you need to change other things as well to make a differently ordered sentence make sense?

### 3.1 Noun phrase order

No(case)un (determiner) (adjective)

### 3.2 Verb phrase order

Ve(infix)rb (adverb) (preposition)

### 3.3 Adposition order

preposition noun-phrase

## 4 Misc Syntax

### 4.1 Reduplication: Makes comparative form of adjectives/augmentative

ex. big → big big

Reduplicated nouns?

### 4.2 Adjective can be infix in nouns

### 4.3 Imperatives

Imperative are formed by placing “need” (k<sup>h</sup>ϕ<sub>̣</sub>p<sup>h</sup>) before the main verb.

ex.

Stab (a) tree.

need stab you<salient> tree<parasalient>.  
 kfpfph khvph 'bhxsh tkhdthvbh  
 kfpfp<sup>h</sup> kh<sup>h</sup>φp<sup>h</sup> ?<p<sup>h</sup>x>ʃ t<kh<sup>t</sup>>θφp<sup>h</sup>

3rd person imperative example:

John must/should stab a tree.  
 need stab john<salient> tree<parasalient>.  
 kfpfph khvph jobhxhn tkhdthvbh  
 kfpfp<sup>h</sup> kh<sup>h</sup>φp<sup>h</sup> jo<p<sup>h</sup>x>hn t<kh<sup>t</sup>>θφp<sup>h</sup>

#### 4.4 Unresolved issues

Do adjectives agree with nouns in plantness?

#### 4.6 Determiners

Plantlang has no indefinite article

### 5 Verbs

Tense, aspect, and mood are shown with a fusional infix. The infix is placed after the first consonant of a word (before the first fricative).

Legendary past is for legends, myths, and stories. Potential future is for prophesizations and other things that portend. Optative is for wishes only, not commands.

Verbal Infixes			
Tense	Mood	Aspect	Plantlang
portential	indicative	simple	-tʃk-
	optative	simple	-tʃkp-
future	indicative	imperfect	
		perfect	-phk-
	optative	imperfect	
		perfect	-p <sup>h</sup> s-
present	indicative	imperfect	-∅-
		perfect	-tʃ-
	optative	imperfect	-tθx-

		perfect	-tθxp <sub>ɪ</sub> <sup>h</sup> -
past	indicative	imperfect	-ʔθp <sub>ɪ</sub> <sup>h</sup> -
		perfect	-ʔθ-
	optative	imperfect	-t <sup>h</sup> θ-
		perfect	-t <sup>h</sup> θp <sub>ɪ</sub> <sup>h</sup> -
legendary past	indicative	imperfect	
		perfect	-pφts-
	optative	imperfect	
		perfect	

## 6 Nouns

### 6.1 Nouns classes

- Plant
- Non-plant (live-giving/good)
- Non-plant (live-taking/non-good)

Nouns agree with pronouns and determiners as follows:

Noun class	Pronoun
Plant	plant
Non-plant (live-giving/good)	non-plant
Non-plant (live-taking/non-good)	

### 6.2 Noun cases

There are three cases that are marked by an infix on the noun. The infix is placed after the first consonant of a word (before the first fricative).

Cases			
Case	Morphology	Use	Example
salient	-p <sub>ɪ</sub> <sup>h</sup> x-	Subject of verb in transitive verbs	“We grow“

		<i>and</i> intransitive verbs that are typically done by plants	" <i>They hunt a fox</i> "
parasalient	-kht̚-	Object of verb in transitive verbs. Subject of intransitive verbs that are not typically done by plants.	" <i>We dance</i> " " <i>They hunt a fox</i> "
benefactive	-t̚θts-	for the benefit of __	" <i>They built a bridge for the town</i> "

## 7 Honorifics

### 7.1 Hierarchy of reverence

Big Big Tree (the oldest) > Older trees > younger trees > tree people > kind-to-trees people > destructive people

### 7.2 Titles

- Mr. Tree "I pity the fool..."
- tree-sama
- Lowly non-moving plant
- Venerable treehugger
- Despicable lumberjack
- Tree (derogatory)

## 8 Pronouns

	Plant		Non-plant	
	English	Plantlang	English	Plantlang
<b>First</b>	Royal we	t̚φ	-	-
<b>Second</b>	You	ʔʃ	You	ʔʃp̚h
<b>Third</b>	Them	tsh (not tf)	Them	p̚xt

## 9 Vocabulary

- Names for different species
- Language color development order:
  - Black/white, (green, brown/yellow, red, blue)

Nouns		
English	Plantlang	Noun

		<b>class</b>
sun, day, white, bright, sky, heat (Fire is too much sun/day/white/etc)	tʃp <sup>h</sup>	life-giving
dark, black, night, soil (Death is too much dark/black/soil/etc)	tθɸp <sup>h</sup>	life-neutral
branch, twig, leaf (Overgrowth is excessive branch/twig/etc)	t <sup>h</sup> kx	plant
water, river, ocean, hydrated (Drowned is too much water/river/ocean)	ʔft <sup>h</sup> t	life-giving
sapling, life, birth, creation, energy	kʃ	plant
mold, hollow, empty, fungus, soft	stʃ	life-neutral
plant	p <sup>h</sup> kθp <sup>h</sup>	plant
tree-person	tθɸp <sup>h</sup>	plant
animal	ʔhp <sup>h</sup>	life-neutral
fruit	tʃhp <sup>h</sup>	
Some type of soil	kxɸp <sup>h</sup>	plant
Big-person, human	ʔʃp <sup>h</sup>	
“Different proportions of fruit juice”		
tree	ʔʃp	plan

Energy+white = sun, specifically

this

<b>Verbs</b>	
<b>English</b>	<b>Plantlang</b>
Grow, birth, create	pθp <sup>h</sup>
Chop, stab, snap	kʃp <sup>h</sup>
Sky-bless (the sun/rain acts in the favor of the trees)	t <sup>h</sup> θp <sup>h</sup>

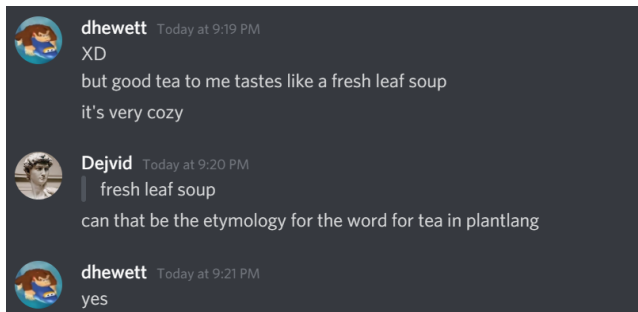

Sky-curse (the sun/rain acts against the trees)	tʰʃp̚h
need	kʰɸp̚h

Adjectives	
English	Plantlang
black	pʃp̚h
white	php̚h
tall	tʰθp̚h
big	ʔθt

<b>Pronouns</b>	see §8
-----------------	--------

Ideas for daughter languages:

- Sport/competition commentary in language
- Story influenced structure

riparian - edge of river

### 10 Sample Text

Kfɸp̚h kʰɸp̚h jop̚hxn tkht̚θɸp̚h. Kfɸp̚h kʰɸp̚h ʔp̚hxʃ t<kht̚>θɸp̚h.  
 Kfɸp̚h khvph jɸbhxn tkhdthvbh. kfɸp̚h khvph 'bhxsh tkhdthvbh  
 John should stab a tree. Stab a tree.

<b>Romanization</b>	Bilabial	Labio-	Dental	Alveolar	Post-	Velar	Glottal
---------------------	----------	--------	--------	----------	-------	-------	---------

		dental			alveolar		
Plosive	p	b /p/	d /t/	t		k	' /ʔ/
Fricative	v /φ/	f	th /θ/	s	sh /ʃ/	x	h
Affricate	pf	bf /pf/	dth /tθ/	ts	tsh /tʃ/	kx	

Aspiration is shown with 'h'

'sh' is ambiguous between /sh/ and /ʃ/

'ph' is ambiguous between /ph/ and /p<sup>h</sup>/
